

## 3809 FIELD INSPECTION FORM

DOGM RECEIVED  
JUNE 18, 1998

S/047/036

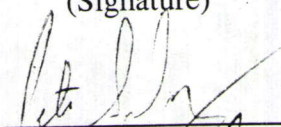

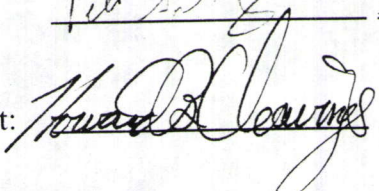

Inspector(s): Peter Sokolosky Date: Jun 6, 1998 Time: 9:15am Notice Serial no. UTU 66362Location: Township: 5S, Range 21E, Section 15, Subdivisions CenterClaimant/Operator Present? Yes/No Notice/Plan on file? Yes/No Is the operation active? Yes/No

Describe type of operation or disturbance (Attach sketch and/or photos): The subject location was inspected after my letter of May 20, 1998 in which I identified that there was one remaining item the operator of record needs to do so the subject notice can be closed - block a roadway to preclude vehicular traffic so two old core drill pad locations so there will be successful revegetation

Describe the extent of reclamation: All the access roads and drill pads under the subject notice had been reshaped, seeded, and inspected for two growing seasons (see other I&E reports in the file). The disturbances were found to be stable and the area, which was scarcely vegetated before, showed signs of growing vegetation as a result of seeding. The only remaining item which needed attention is cited above - blocking of vehicular access (location where such an obstruction will be placed is identified by the arrow on the photograph attached) The BLM will provide a sign indicating the area has been reclaimed and is closed to vehicular traffic.

Describe access (trail, improved road, etc.): The two track road in the photograph ends just to the right of the photograph and continues on private land (private land starts at the arrow in the photo and beyond) .4 mi. to the north where it intersects a network of unimproved roads which lead into the Vernal, Utah area (in background of photo).

Other comments: Mr. Carl Minden, representative of Asphalt Ridge, Inc. (previously Native Asphalt Co.) and Mr. John Robinson (of Tonka Excavating of Vernal) were in attendance during the inspection. We selected the subject point where the vehicular barrier is to be emplaced. When the work is completed, the subject notice will be closed.
